

IN THE SPECIFICATION

Please replace the paragraph beginning at page 31, line 9, with the following rewritten paragraph:

Specifically, by setting the time-out time 51 for the case where a user sets an original onto the contract glass (or the original table) sheet by sheet longer than the time-out time 50 for the case where the ADF 23 is used, it is possible to ~~determined~~ determine an end of a document in consideration of a time required for a user to replace each sheet of a document and position the sheet.
